

FBR Large Cap Financial Fund

September 30, 2011

INVESTMENT OBJECTIVE

The Fund seeks long-term capital appreciation by investing primarily in the equity securities of domestic financial services companies.

PORTFOLIO MANAGEMENT

David Ellison, CIO of The FBR Funds

- » Most tenured mutual fund portfolio manager in the Financial Services sector
- » Over 27 years of investment industry experience
- » Joined The FBR Funds from Fidelity in 1996, and has managed the Large Cap Financial Fund since inception
- » At Fidelity, David managed the Select Home Finance Fund for 11 years and developed his investment philosophy under the tutelage of famed value-investor, Peter Lynch

INVESTMENT STRATEGY

The Fund employs a fundamental, bottom-up investment strategy to identify companies within the financial services industry that exhibit the following characteristics:

- » Solid business models, low-cost operating structures and prospects for sustainable earnings growth
- » Conservative lending culture and high quality liabilities
- » Emphasis on attractive valuations based upon traditional industry relative value measures

The net result is a diversified portfolio of financial companies that aims to provide shareholders with conservative exposure to the financial services industry.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. The performance data quoted represents past performance and the current performance may be lower or higher than the performance data quoted. The investment return and principal will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. The performance data does not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption fees. The Fund charges a redemption fee of 1.00% on shares redeemed or exchanged within 90 days; if reflected, the redemption fee would reduce the performance quoted. To obtain performance data current to the most recent month-end please call 888.200.4710.

Important Disclosures

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. This and other important information can be found in the Fund's prospectus. To obtain a free prospectus, please call 888.200.4710 or visit www.fbrfunds.com. Please read the prospectus carefully before investing.

Investments are focused in the financial services industry which may be adversely affected by regulatory or other market conditions such as rising interest rates.

Indices are unmanaged and have no management fees or operating costs that reduce reported returns. The volatility and other risk characteristics for the Fund will differ from the volatility and risk characteristics of the indices.

Morningstar Specialty Financial Category consists of those portfolios that seek capital appreciation by investing primarily in equity securities of U.S. or non-U.S. financial services companies, including banks, brokerage firms, insurance companies, and consumer credit providers.

S&P 500 Index is a capitalization-weighted index of 500 stocks. The Index is designed to represent the broad domestic economy through changes in aggregate market value of 500 stocks representing all major industries.

Philadelphia Bank Index (BKX) is a capitalization-weighted index consisting of 24 exchange-listed and national market system stocks, representing national money center banks and leading regional institutions.

Morningstar Proprietary Ratings reflect risk-adjusted performance as of 9/30/11. For each fund with at least a three year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar risk-adjusted return measure that accounts for variation in a fund's monthly performance placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in distribution percentage. The Fund received 3 stars for the three year, and 4 stars five year and ten year periods ended 9/30/11 among 98, 89 and 67 Specialty Financial Funds, respectively. ©Morningstar, Inc. All Rights Reserved.

Morningstar Risk scores for a given time period (three, five, or 10 years) reflect the Fund's Morningstar risk score plotted on a bell curve: Monthly calculations are based on whether the Fund scores in the top 10% of its category, its risk score is considered High; if it falls in the next 22.5% Above Average; a place in the middle 35% is Average; those lower still, in the next 22.5%, are Below Average and the bottom Low. Overall Morningstar risk score is a weighted average of the available three, five, and 10 year Morningstar risk scores. Investments with less than three years of performance history are not rated.

Morningstar Return scores for a given time period (three, five, or 10 years) reflect the Fund's Morningstar return score plotted on a bell curve: Monthly calculations are based on whether the Fund scores in the top 10% of its category, its return score is considered High; if it falls in the next 22.5% Above Average; a place in the middle 35% is Average; those lower still, in the next 22.5%, are Below Average and the bottom Low. Overall Morningstar return score is a weighted average of the available three, five, and 10 year Morningstar return scores. Investments with less than three years of performance history are not rated.

P/E Ratio is the market price per share divided by earnings per share.

Price/Book Ratio is the market price per share divided by book value.

Standard Deviation shows the degree of variation in the Fund's returns and can serve as a useful measure of the Fund's risk. It is measured using monthly observations, but expresses the result on an annualized basis.

Beta is a statistical measure of the Fund's volatility relative to the broader peer group is measured against the S&P 500 Index, which is deemed to equal 1.00. A beta higher than 1.00 means the Fund has experienced greater sensitivity to swings in the market, while a beta of less than 1.00 means the Fund has experienced less sensitivity.

Alpha is a measure of performance on a risk-adjusted basis. Alpha compares the volatility (price risk) of the Fund to risk-adjusted performance of the S&P 500 Index. The excess return of the Fund relative to the return of the Index is the Fund's alpha.

Market Capture Ratios is a statistical measure of the Fund's overall performance in up-markets (positive return periods) and down-markets (negative return periods). The market capture ratios are used to evaluate how well an investment performed relative to an index during periods when that index has risen or fallen. The ratio is calculated by dividing the Fund's returns by the returns of the index during the up-market or the down-market, and multiplying that factor by 100.
